

The Locavore's Dilemma: In Praise of the 10,000-Mile Diet

"If widely adopted, either voluntarily or through political mandates, locavorism can only result in higher costs and increased poverty, greater food insecurity, less food safety and much more significant environmental damage than is presently the case."

Pierre Desrochers & Hiroko Shimizu, The Locavore's Dilemma

Author Meets Critic

Thursday, November 29, 2012
7:00-9:00pm

608 Robertson Hall (Senate Room), Carleton University

IDEAS WORTH DEBATING

Dr. Pierre Desrochers

Dr. Pierre Desrochers is an Associate Professor of Geography at the University of Toronto and co-author (with Hiroko Shimizu) of *The Locavore's Dilemma*. He has published more than 40 peer-reviewed

articles on topics ranging from economic development and globalization to energy and transportation issues. Dr. Desrochers is affiliated with numerous policy research centers and has always made an effort to reach a broad audience through his more than 100 columns, shorter pieces, and regular contributions to various media outlets. To learn more about *The Locavore's Dilemma*, visit www.globavore.org

Dr. Peter Andrée

Dr. Peter Andrée is an Associate Professor of Political Science at Carleton University. He has had a meandering educational journey from the natural sciences, through philosophy and community development,

to environmental studies, geography, and now political science. Dr. Andrée's teaching and research focuses on international and Canadian environmental politics, as well as the political economy and political ecology of agriculture and the food system. His first book, on the global politics of regulating genetically-modified crops and foods, was published by University of British Columbia Press in May 2007.

We put the issues on the table.
